PROFESSIONAL SUMMARY

Aspiring Software Engineer and 2nd-year BCA student with strong foundation in Full-Stack Web Development (MERN) and IoT systems. Passionate about solving real-world problems through technology. Proficient in Data Structures in C, API integration, and building responsive, accessible user interfaces. Active participant in 24-hour hackathons and technical competitions.

TECHNICAL SKILLS

- **Languages:** C, JavaScript (ES6+), Python, HTML5, CSS3
- **Frontend:** React.js, Bootstrap, Responsive Design
- **Backend:** Node.js, Express.js, RESTful APIs
- **Tools:** Git, GitHub, VS Code, Arduino
- **Database:** MongoDB, SQL
- **Concepts:** DSA in C, IoT, OOP

EXPERIENCE & HACKATHONS

Deloitte Technology Job Simulation <i>Job Simulation Participant</i> • Completed practical tasks in Coding and Development.	Jan 2026
Deloitte Data Analytics Job Simulation <i>Job Simulation Participant</i> • Completed practical tasks in Data analysis and Forensic technology.	Jan 2026
Deloitte Cyber Job Simulation <i>Job Simulation Participant</i> • Completed practical tasks in Cyber security.	Jan 2026
Smart India Hackathon (SIH) 2025 <i>Technical Team Member Future Institute of Engineering and Management</i> • Participated in internal selection with Team 'Codanova'. • Contributed to Smart Traffic Management System architecture to reduce urban congestion. • Utilized React.js and Node.js in 6-member team.	Sep 2025
Hackathonix (24-Hour Hackathon) <i>Full-Stack Developer (Finalist) Future Institute of Engineering and Management</i> • Led Front-End development for MediConnect, a real-time health locator platform. • Designed accessible UI and integrated chatbot for health queries using React & JavaScript. • Delivered functional MVP under high-pressure constraints.	Apr 2025
Innovation Tech Fest <i>IoT Developer Future Institute of Engineering and Management</i> • Developed AquaFlow, a smart water monitoring prototype using Arduino. • Integrated Flow Sensors (YF-S201) and C++ logic for real-time water usage tracking.	Mar 2025

KEY PROJECTS

EcoScan AI - AI-Powered Waste Detection Platform | JavaScript, Node.js, Gemini Vision API

- Detects and reports environmental waste using AI image recognition and interactive maps.

MediConnect - Smart Health Finder | React.js, Node.js, Google Maps API, OpenAI API

- Full-stack health-tech platform to locate hospitals and book appointments.

Jarvis - Voice AI Assistant | Python, SpeechRecognition, Gemini API, LangChain

- Voice-activated assistant using Gemini API for NLP; executes system commands and web searches.

Lumo AI - Advanced Smart Chatbot | HTML, CSS, JavaScript, Python

- Feature-rich chatbot with dark/light modes and chat history management.

EDUCATION

Bachelor of Computer Applications (BCA) - Hons. Future Institute of Engineering and Management Kolkata, India AICTE Approved Current Semester: 3rd Sem	2024 – 2028
Higher Secondary (12th) Langalberia Surath Smriti Vidyamandir (Arts: Geography, Psychology, Education, Bengali)	Completed

CERTIFICATIONS & ACHIEVEMENTS

- **Deloitte Technology Job Simulation:** Certificate of Completion (Jan 2026)
- **Deloitte Data Analytics Job Simulation:** Certificate of Completion (Jan 2026)
- **Deloitte Cyber Job Simulation:** Certificate of Completion (Jan 2026)
- **Smart India Hackathon (SIH) 2025:** Certificate of Participation - Internal Hackathon (Team Codanova, Sept 2025)
- **Hacktonix 2025:** Certificate of Participation - PHOENIX'25 Techno-Management Fest, FIEM
- **Build On Stacks:** Blockchain Development & Smart Contracts (Rise In)
- **Cloud Computing Fundamentals:** IBM SkillsBuild
- **Design Thinking:** IBM SkillsBuild
- **Inception 2025:** Technical Project Competition (FIEM)
